

About You

- Your account name is **Sammidi Vinod Kumar**.
- You are interested in **computer science, software development, AI, computer vision, and engineering projects**.
- You prefer **practical, implementation-focused guidance** with complete code, architecture, cost estimates, and step-by-step instructions.
- You often work on projects locally on Windows and have discussed hardware such as:
 - 16 GB RAM system
 - NVIDIA RTX 3050 GPU
 - Offline AI/LLM setups

Ongoing / Previously Discussed Projects

1. Engineering Student Portal (Major Project)

You are building an internal portal for engineering students at **Anzai University**.

Target Users

- Around **5,000 students**
- Mainly Computer Science and Information Technology students

Planned Features

- Attendance tracking
- Class materials and notes
- Classroom allocation
- Technical event management
- Cultural event management
- Suggestion/complaint box

Technology Choice

- Backend planned using **Firebase**

What You Requested

- Detailed requirements document
- System architecture document
- Cost estimation

- Scalability planning
- Future expansion for junior batches
